

Plymold®

CASE STUDY

FURNISHING A FOOD PROCESSING PLANT CAFETERIA

BACKGROUND

As part of ongoing facility improvements, this food processing company sought to modernize its cafeteria to better serve its workforce. With employees working long shifts in a physically demanding environment, the company needed a space that was comfortable, functional, and efficient. Seating had to be versatile enough to accommodate employees of all body shapes and sizes, while also being durable enough to withstand heavy daily use.

CHALLENGE

With needing versatile seating arrangements, their goals included:

- High-top café seating with integrated charging stations.
- Fixed seating for dining areas.
- Lounge seating for relaxation.
- Compliance with production facility guidelines.

Moreover, the company required a partner who could offer a comprehensive solution from design to installation, despite the geographical distance between the end user in Virginia and the dealer in Pennsylvania.

THE PLYMOLD SOLUTION

The client selected Plymold for their cafeteria renovation, valuing our commitment to U.S. manufacturing and our ability to manage the project from start to finish.

Key factors in their decision included:

Made in the USA

With a strong emphasis on sourcing American-made products, the client saw Plymold as the ideal partner to furnish their commercial space.

Comprehensive Support

Our experienced team collaborated closely with the plant manager, providing extensive guidance through multiple calls and layout revisions to ensure the final plan met specifications and complied with facility requirements.

Educational Guidance

We educated the client on the importance of accommodating larger body sizes in fixed seating and ensuring adequate belly room—an important factor they had not previously considered.

One-Stop Solution

By offering a wide range of commercial furniture options, including cluster seating, employee lounge pieces, and powered dining counters, we streamlined procurement and installation into a smooth, efficient process.

FURNITURE**

RESULTS

The project was a success, achieving the client's goals and exceeding their expectations. The results included:

01

Smooth Project Execution

From initial consultation to final installation, the project proceeded without significant issues. The expertise of the Plymold team facilitated seamless communication and effective problem-solving amongst various teams across multiple states.

02

Customer Satisfaction

The client was highly pleased with the process and the final outcome. They especially appreciated the comprehensive support and the ease of working with Plymold.

03

Enhanced Cafeteria Environment

The new seating arrangements created a modern, functional, and inclusive cafeteria space that accommodates all body shapes and sizes. The integration of charging stations and employee lounge furniture provides additional convenience and comfort for employees.

04

Durable Products & Reliable Warranty

The client was thrilled with the durability and reliability of Plymold products, and the fact that they are supported by strong warranties provides them with extra assurance and peace of mind.
